

Play relaxed.

www.play-relaxed.info

The Waveline™ headjoint shortens the instrument in such a way as to relieve the spine from unnecessary strain - without affecting the superb sound or intonation options. This is especially important for practice where any form of strain is likely to cause fatigue.

Another specificity of the Extension Kit is the possibility to use just about any standard-sized headjoint. Before using a different headjoint, the latter should be adjusted by a specialist to ensure that the flute performs at its finest with the selected headjoint. Do not hesitate to ask your music dealer for details.

Whenever the flautist wishes to play without the Waveline™ headjoint, the Extension Kit can be used to transform the instrument into a straight flute with a standard length.

The JFL700WRXE Waveline™ flute comes with open-hole keys. The supplied metal plugs can be used to close the holes, which may be more reassuring for entry-level flautists.

The versatile flute with a surprisingly vibrant sound

JFL700WRXE

www.play-relaxed.info

- open hole keys and metal plugs · split E mechanism · trill keys · C footjoint · two JUPITER cases for suitable use, stand and accessories

The Jupiter Loop Concept

The JFL700WRXE with the Extension Kit applies to the highly successful JUPITER Loop concept. This is based on the intention to facilitate and speed up learning to play the flute. Great care has been taken to ensure that this approach has no audible effect on the instrument's sound quality. As a result, flutes using this approach make learning and practicing the instrument more fun than ever before.

Now, try how relaxing flute playing can be.
