

LOOP

...and the fun begins!

JUPITER

LOOP

The flute - your biggest dream?

with your JUPITER D-Loop the fun begins much earlier now. From the age of 5.

The D-Loop has a unique, patented construction. It was especially made for you to do everything right from the very beginning. On a real flute!

It's lightweight, short and fits your body size perfectly. It also looks great, is easy to play and sounds beautiful. So beautiful, that you don't ever want to put it down again...

A flute to fall in love with.

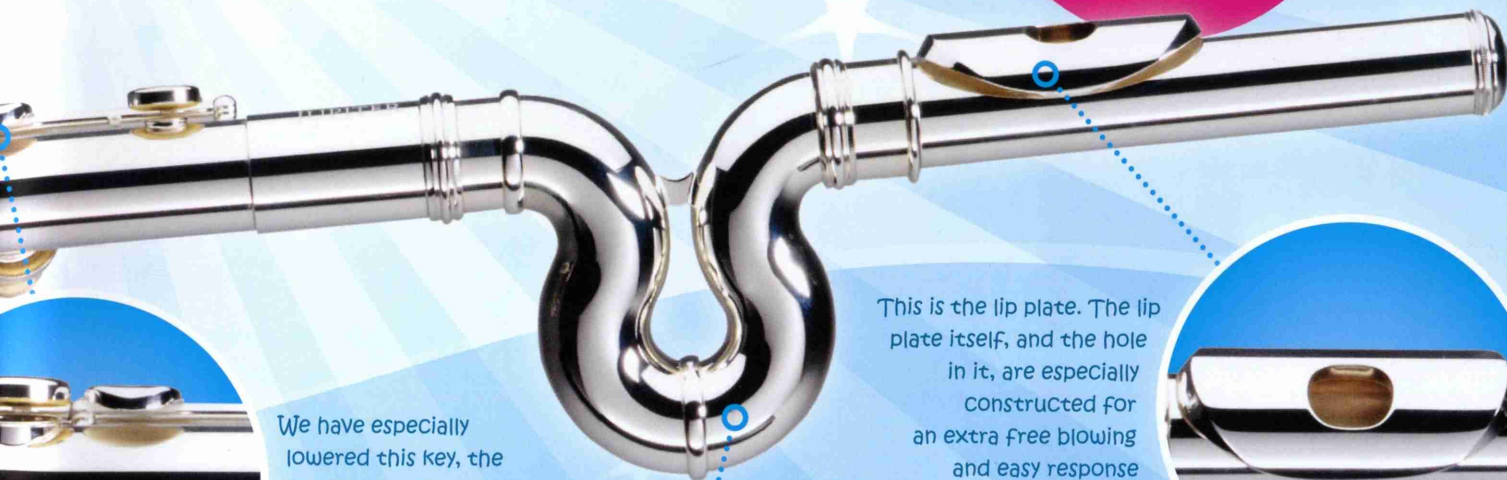

The D-Loop plays down to low „D“ - thats why it's called „D-Loop“. Nevertheless you won't have to relearn later. Everything is perfect- right from the start!

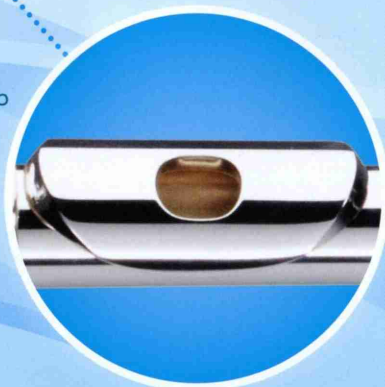

We have added special finger buttons to some of the keys. With them you can easily reach any note without cramping your fingers

LOOP

We have especially lowered this key, the C#- key, for your small fingers so you can play even more comfortably.

This is the lip plate. The lip plate itself, and the hole in it, are especially constructed for an extra free blowing and easy response

This is the best bit: The patented wave line bow, which we called „Loop“, shortens the flute so significantly, that you can start playing the flute from the age of 5 without bending your spine. Also, your D-Loop stays in perfect balance due to the fact the loop points downwards, no twisting. The lip plate and the keywork align like a regular straight flute. For these reasons you can hold this flute correctly and proceed learning extraordinarily quickly. That's fun for you, your parents, and your teacher...

it comes with a case, a flute stand and accessories

Once upon a time...

Little Lilly was an ordinary girl. Cute, nice, and sometimes naughty. And like every other little girl she had a dream.

Recently she had been to a concert, together with her parents, there it happened. A lady played the flute so beautiful and with such silvery tones that the music enchanted Lilly's heart. She also saw the spotlights of the stage twinkling on the shiny flute.

From this night on, Lilly couldn't think of anything else, she wanted to play the flute too. But whoever she asked, everyone told her she was way too small and her arms much too short.

At night, as Lilly laid asleep, she wished as strong as someone can wish, that her arms would quickly grow.

LOOP

And every morning she took a look in the mirror but her arms were still as short as the day before.

However, one day something amazing happened.

In a land far, far away behind the big mountains there lived a man who was a flute maker. He was a real master craftsman who could even make flutes of pure gold.

One night, whilst Lilly was sleeping, she had a very special dream. That night her dream grew wings and it flew to the land where the master flute maker lived. Like Lilly he was also fast asleep but wasn't dreaming so the dream decided to settle down in the master flute makers mind.

When the master awoke the next morning the dream was still on his mind. He saw a little girl whose arms magically grew until they were long enough to hold a flute. „Nonsense“, he said to himself, „that's impossible“. But suddenly he had an idea. How many little girls dreamt of playing the flute but could not because their arms grew too slowly? „Just a moment“, he said to himself, „If their arms don't grow fast enough then the flute has to become smaller“. He locked himself inside his workshop for a very long time. He tried this and that, scribbled, tried and tinkered. Because he was a real master, he finally had the idea he needed.

He had it straight in his mind and the flute wasn't straight anymore.

He called for a flute teacher, a teacher who had taught countless kids how to play the flute. He showed his invention to her and she was instantly enthusiastic. Because of the bow, the flute was short enough now to be played by much smaller kids.

Rapidly the news spread around the world. Nobody now told a child „you're far too small for that“ anymore. Not much later, Lilly got her first real flute, which was named „Loop“. Lilly and her Loop were inseparable ever after. She practiced, rehearsed and played. Some lucky day her dream came true, she gave her first concert. And on that night, again there was a tiny little girl, sitting in the audience and she had a dream...
