JUPITER - play together!

Music at its finest with JUPITER Quality Wind Instruments

For over 35 years we have been developing and building wind instruments according to the highest quality standards. Countless innovative ideas, such as the Waveline™ Flutes and Ergonomic Trombones, have been successfully developed. For such developments, we like to collaborate with internationally acclaimed musicians and highly qualified teachers whose input is solicited at every step along the way. JUPITER's reliable, durable and high-quality wind and brass instruments are your ticket to a promising career in music.

■ JUPITER 500 Series

Sturdy instruments with a smooth response. Ideal for those who wish to learn an instrument.

■ JUPITER 700 Series

Instruments that spark your ambition, passion, enjoyment and excitement. They support players with a remarkable quality level and great sound.

■ JUPITER 1000 Series

These are instruments whose quality is akin to that of the 1100 Performance Series that satisfies special demands.

■ JUPITER 1100 Performance Series

Instruments built using special techniques and various materials to satisfy the high demands of experienced and professional musicians.

Visit www.jupiter.info for details.

Your Flute

JUPITER Flutes have a touch of lightness that supports an ergonomic posture when playing the Waveline™ Flutes, that offers an easy response with a warm and full sound when playing a student flute of the 700 Series or when playing a special bass or contra bass flute.

Your JUPITER Flute feels just right. Its expertly crafted nickel silver pipe fits snugly in your hands and is enclosed by a smooth nickel silver mechanism, that gives you a reliable feeling and satisfaction when playing.

Hearing the sound of your flute come to life as you play the music at hand with confidence and sheer enjoyment is a unique experience.

Why you should play the flute!

1. The sound: exceptionally smooth and warm.
2. Compact, lightweight instrument.
3. Versatile: classical music, jazz, pop, rock and brass-band music.
4. Relatively easy and quick to master.
5. Helps you train your dexterity and concentration.
6. Easy transition from other woodwind instruments thanks to similar fingerings.
7. Meet fellow musicians, quickly connect to people in unknown places, experience the benefits of a tight-knit musical community.

Take a look behind the scenes by JUPITER and learn about the production and quality of JUPITER instruments.

JUPITER Waveline™ C Flutes

TIP

The Waveline™ Flute with a C footjoint is also suitable for professional flautists wishing to practice in the most relaxed way possible.

The flute for a healthy posture right from the start

The Waveline™ Flute was developed by Professor Barbara Gisela-Haase and the Viennese flute maker Werner Tomasi. The innovative design allows a substantial amount of the flute to be shortened that helps relieve strain on the back and spine of students. This design helps to avoid posture problems right from the start and offers the foundation for relaxed playing, higher motivation, longer endurance and more playing fun.

The JUPITER LOOP Concept

The Waveline™ Patent: The reinvention of the flute

The LOOP Concept and the patented Waveline™ Flutes are a refinement of JUPITER's endeavor to encourage young players to pick up the flute. This concept is available in different sizes and ranges that perfectly match the bodies of young players of different age groups.

As far as we are concerned, our Waveline™ Flutes with their proprietary loop are just the beginning of an entire family of novel instruments.
